Ambitious Computer Science student Offering strong understanding of Software Development, Application support and design. Proficient in Object Oriented Programming, DBMS, Web Development, Operating Systems, SDLC, Designing Patterns. Eager to learn new technologies and skills to maximize contributions to user, team and towards organization success.

## Skills

**Programming** : Python, C, Java, JavaScript, HTML, CSS, Verilog (HDL)

**Data Management** : MySQL, Postgres, Relational Database

**Software Development** : SDLC, Design Patterns, Data Structures & Algorithms, Jira

**IT Fundamentals** : TCP/IP (IPv4 and IPv6), subnetting, DNS, Network, FTP, Cyber Security

**Expertise** : OS, GitHub, Java, VS Code, IntelliJ, Ecommerce

## Employment

**2020 Nov –**

**IT Support Specialist**

**2021 April**

*NHL/ESPN - ESPN Division at Sutherland Global, Windsor, ON*

- Utilizing system tools and specialized backend system to update and fix technical issue.
- Tracked and prioritized IT tickets and requests based on severity and potential business disruptions involved and bug tracking.
- Reviewed requests for service to resolve IT difficulties, documenting and fielding tickets to improve problem resolution.

**2017 Aug –**

**IT Support Associate / Delivery Driver**

**2019 Sept**

*Max Auto Supply(LKQ), Etobicoke, ON*

- Set up new desktop systems and configured laptops for incoming employees and loaded required software and server permissions.
- Installation and configuration of software and hardware, maintaining software licenses and patching applications to stay up-to-date with latest features.
- Grouped and routed deliveries according to designated areas to maintain efficient delivery times.

## Education

**Expected**

**Bachelor of Science: Computer Science**

**Dec 2021**

York University - Toronto, Ontario

## Projects

**Python project** : Python, Design Pattern, GitHub, Docker, SDLC

Vaccine Booking Script:

- Contributed on GitHub DOCTOSHOTGUN a script written in Python that lets user automatically book a vaccine slot on Doctolib in France and Germany. Applied different design patterns and improvements on script.

**DBMS Project**: PostgreSQL, MySQL.

Contact Tracing and SQL queries on Database:

- Designing the E/R diagram and schema to populate the data base for the contact-tracing domain, populate the tables with some example data, and then execute required SQL queries to field a contact-tracing database to help contain an epidemic using PostgreSQL RDBMS.

**OOP project**: Java, UML, GitHub, Junit, API

- Responsible to implement the CT Scan application described by API that included constructors, constant-valued fields, inheritance, encapsulation, abstraction and methods along with other OOP concepts to program a CT Scan application.

**Ecommerce** : Shopify, Digital Marketing, Web Development,

Setupscaze: Founder of online platform

- Online Ecommerce store for computers electronics and setup needs.
